

ADAMA LEGION®

LEGION® is a residual herbicide used in winter oilseed rape, pre and early post emergence of the crop, to control annual meadow-grass and broad-leaved weeds, including difficult to control weeds such as poppy and cleavers.

Key Benefits

- Broad spectrum control including annual meadow-grass, cleavers and poppies
- Additive black-grass activity
- Flexible timing pre- and post-em.
- Provides resistance management for ALS resistant broad-leaved weeds

Advisory Information

This product contains metazachlor plus quinmerac and is therefore included in the 'OSR Herbicides? Think Water' stewardship campaign. Particular care is needed when using in Surface Water Drinking Water Safeguard Zones:

- Do not use after 30 September on drained fields, including mole-drained.

In other areas:

- Avoid use after 15 October on drained fields, including mole-drained.

Product Information

Active ingredients:
375g/L metazachlor
& 125g/L quinmerac

Formulation:
Suspension Concentrate

Pack size: 10 litres

Application Information

Water volume: 150-250L/ha

Spray quality: Medium

LERAP: B

Crop Information

Targets	Max individual dose (L/ha)	Max number of applications (per crop)	Latest timing
Oilseed rape	2.0	1	Up to 4 leaf stage and before end of January

LEGION® @ 2.0L/ha pre-emergence to GS 14

Max. total dose of 1.0kg metazachlor/ha in a 3 year period.
